

IPE CHALLENGE!

PURPOSE: To learn about roles and responsibilities of various professions and their interrelationships.

OBJECTIVE: To learn about the various professions and their interrelationships and to understand the importance of each profession.

PLAYERS: At least three different professions.

SETUP: The game is played on a table. The cards are placed in a row to the right of the player.

The E "energies" are placed on the table. The cards are placed in a row to the right of the player. The cards are placed in a row to the right of the player.

HOW TO PLAY:

Each player takes a turn to see who is first. A player starts the game by drawing a card and reading the question or statement to the group. The other players then answer "Yes" or "No". The player who is first to answer correctly wins the round. The player who is first to answer incorrectly loses the round. The game continues until all cards have been used.

As an example: You land on nursing. The player to your right draws a card and reads the question or statement to you "Practitioners in this profession must have at least a Bachelor of Science degree to practice." You answer "No". Being a nursing student, you have encountered nurses that only have an associate of science degree so this statement is not true. You can choose to share this information with the group as a supportive statement to your answer. The player
